Other: see the attached signed PTO-1449 for IDS filed on 12/11/06.

Primary Examiner Art Unit: 1763 Continuation of 11. does NOT place the application in condition for allowance because: applicant argues that Ishii et al. does not disclose the claimed positioning step as suggested by the examiner. However, the examiner respectfully points out that the word "positioning" is a broad term and when giving the claim its broadest reasonable interpretation, fig. 9 of Ishii et al. does show the positioning limitation.

Regarding the Yoshida reference, the examiner respectufly suggests that using the apparatus of Yoshida the outer portions of the antenna will be moved/turned relative to the inner portions of the antenna and the relative angular positions of the exterior and interior portions of the coil will be changed.

Applicant also argues that Ishii does not disclose plural parallel electrically connected windings. However, note that the turns in fig. 9 are clearly parallel. Moreover, note that the Chen reference is relied upon to show the nature of the electrical connections of the windings.

Applicant additionally argues that Savas fails to show a method of manufacturing many inductive plasma processors so tests conducted on each processor indicate optimum uniform plasma distribution is achieved in each processor. However, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See In re Keller, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); In re Merck & Co., 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See In re McLaughlin, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

With respect to the Ni et al. reference, the coil of Ni et al. is moved at different portions in relation to other portions (see at least the abstract). Additionally, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See In re Keller, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); In re Merck & Co., 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).
